## School of Electrical Engineering and Informatics, Institut Teknologi Bandung

IEEE Indonesia Section

Institution of Engineers Indonesia

Indonesia demand on energy, especially energy, has grown very fast in the last decades following the economic growth. With population more than 250 millions, Indonesia has become a significant economic in the region. The geographic of Indonesia that consists of more than ten thousand islands has created technical challenges that not existed in the other regions. Similar to other countries, Indonesia has developed various green technologies to solve energy problems and to increase the ratio of electrification. As the geographic condition is different to other countries.

The International Conference on Power Engineering and Renewable Energy (ICPERE) is a regular conference that is sponsored by the Institute Technology Bandung, the Institution of Engineers Indonesia and the IEEE Indonesia section.

Engineers and Scientist around the world are encouraged to submit their papers in the following topic, but not limited to:

- Power generation
- Power transmission and distribution
- Power system control and stability
- High voltage engineering
- Lightning protection
- Insulation technology
- Electrical machinery
- Power electronics
- Electric drives
- Power quality
- Renewable power generation
- Smart grid
- Distributed generation
- Electric vehicles
- Active filters
- Industrial power systems
- Green facilities and industries
- Green telecommunication
- Electromagnetic compatibility
